CLGE: a definition

CLGE is the leading representational body for the Surveying Profession in Europe.
- Promotes the Profession in the EU
- Fosters its development in the Council of Europe

Surveying includes Cadastral Surveying which provides security to land and property title and thus underlies the economic base of western society.

Geospatial Information is now ubiquitous in our lives and the Surveyor plays a fundamental role in this field.
Strategic Goals of CLGE

- Influence;
- Visibility;
- Renewal;
- Members Satisfaction.
European Code of Conduct

Preamble

European Surveyors are professionals with the academic and professional qualifications and legal and technical expertise to undertake a range of surveying tasks (a non-definitive definition of the profession is described in Appendix 1 to this Code of Conduct).

The work of European Surveyors is fundamental to the provision, delineation, maintenance and enhancement of the physical, environmental, social and economic environment in which we all live, work and travel. In their roles within the environment and the functioning of the legal systems of Europe, they recognise their basic responsibility to ensure the protection of both consumers and our unique environment. In this way, European Surveyors make an exceptional and vital contribution to the quality of life for all European consumers.

Their professionalism, skill, expertise and objectivity in achieving the efficient and effective planning and administration of the physical, environmental, social and economic environment ensure the quality and sustainability of all human activities undertaken within Europe. Thus, they have a clear and constant responsibility to the European Community, their respective governments, their clients and to the wider public, for the long-term well-being of both current and future generations.

Their professional expertise and independence which are underpinned by the highest levels of professionalism and ethical principles ensure the quality of surveying services. This is assured by the disciplinary regulations of their national associations, this Code of Conduct and, where appropriate, by legal authorisation and national regulations.
European Code of Conduct

• Implementation of the Code
  – Transposition
  – Adoption
  – Acknowledgment

• Monitoring
  – Implementation process
  – Use of the code (Statistics)
European Real Estate Area Label
