GIS DATA LAYERS

Many different types of data can be integrated into a GIS and represented as a map layer.

Examples can include: streets, parcels, zoning, flood zones, client locations, competition, shopping centers, office parks, demographics, etc.

When these layers are drawn on top of one another, undetected spatial trends and relationships often emerge. This allows us to gain insight about relevant characteristics of a location.

BRUSSELS 05 APRIL 2019

AM/FM-GIS

- Automated Mapping
- Facilities Management
- Geographic Information Systems / Sciences
- European NPO under Belgian Law
- Part of the umbrella of AM/FM-GIS Europe
- Goal: promote the use of GI in BE-LUX
- Enhanced activity at the EU level

BRUSSELS 05 APRIL 2019

Vision 2030 – BeGeo 2019

 - Begeo 2019 was an eye opener

Policies based on GI

- Specific sectors
 - Mobility; Urban Planning; Security ...
- Case studies
 - Be-Alert
 - Housing, mobility and climate
 - Smart cities and smart citizens
 - Economy and innovation
 - Education

Soyez alerté en situation d'urgence

**METEEN VERWITTIGD BIJ
EEN NOODSITUATIE?**

**ALERTÉ DIRECTEMENT EN
SITUATION D'URGENCE ?**

**SOFORT ALARMIERT BEI
NOTFALLSITUATIONEN?**

A large banner image showing a street scene at night with a fire and thick smoke. A white shield-shaped frame is overlaid on the left side of the image, showing a view through a narrow street with buildings and a crowd of people.

BRUSSELS 05 APRIL 2019

Policies based on GI

- Specific sectors
 - Mobility; Urban Planning; Security ...
- Case studies
 - Be-Alert
 - Housing, mobility and climate
 - Smart cities and smart citizens
 - Economy and innovation
 - Education

Conclusion

- Same remarks apply at the EU-lever
 - Better coordination
 - Strong relationship between the public sector, the private sector and the citizen
 - Good knowledge about the importance of GI
 - Policies based on GI
- Agency in charge of Geo-Information
