# *“Horizon 2030 - Visions and Challenges in GI”*

*Monica Sebillo  
AMFM GIS Italia  
msebillo@unisa.it*

*EUROGI Members Meeting  
Brussels, Belgium, 5 April 2019*

# What are your (as national GI association/company/NGO) main challenges at the moment

---

- To acquire again a role of reference in the context of GI at national level.
- To find forms of involvement for new recruits
- To demonstrate that through geographic information it is possible to make existing data assets interoperable

# What would be the main priorities of your organisation in the future

---

- The improvement of the role we are playing as a hub among Europe, Italy and local authorities.
- The promotion of learning, training and certification of skills in the field of GI
- Actions for (open) data certification

# What are the main challenges of GI sector you foresee in the next five years

---

- Identifying and promoting cross-fertilization among different domains
- Promoting the use of standards
- Certifications of GI skills

# What opportunities you see for GI sector in the next five years

---

- Geographic Information *must* become a driving force of the sustainable development, contributing to the Agenda 2030 goals.
- National Federated Infrastructure Information Service (SINFI)
- Profiles for very specialized topics
